SUMMARY

Full-stack Software Engineer and B.Tech (CSBS) graduate with production experience delivering **100+ merged pull requests** in a large-scale **React + TypeScript** enterprise application. Comfortable across the stack and **polyglot on the back end** — building REST APIs in both **Node.js / Express** and **Java / Spring Boot** — with MongoDB & PostgreSQL, real-time Socket.IO, and secure JWT authentication.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Java, SQL, C++, HTML5, CSS3
Frontend: React.js, Vite, Redux, TanStack Query, Tailwind CSS, Ant Design, AG Grid Enterprise, i18next
Backend: Node.js, Express.js, Java, Spring Boot, Spring Security, REST APIs, JWT, Socket.IO, Zod
Databases & ORM: MongoDB, PostgreSQL, MySQL, Mongoose, Prisma, JPA / Hibernate, Flyway
Tools & Practices: Git, GitHub Actions (CI/CD), Docker, Maven, Jira, Agile/Scrum, Vitest, JUnit

EXPERIENCE

Software Engineer Intern — *UI/UX Redesign Team, 24/7 Software* Jan 2026 – Jun 2026

- Delivered **100+ merged pull requests across 14 feature tickets** in a large-scale React + TypeScript enterprise web application, sustaining an 84% pull-request merge rate.
- Built the **Lost & Found module** end-to-end (Matching Items and Claimed Items workflows) and engineered a **reusable advanced-search component** adopted across **4+ data grids**, cutting duplicated search code.
- Developed **11+ permission-gated configuration pages** (Incident Types, Request Types, Note Templates, Checkpoint Categories, and Vendor/Material/Asset/Work-Order form layouts) using AG Grid Enterprise data grids.
- Proactively audited live production code and resolved **7+ defects across ~15 modules** (Excel-export failures, permission gating, and API data-parity bugs), porting the fixes to production.
- Reviewed **12+ teammates' pull requests** and collaborated with product owners and tech leads in an Agile/Scrum workflow (daily stand-ups, Jira).

Stack: React, TypeScript, Vite, TanStack Query, Ant Design, AG Grid Enterprise, Socket.IO, i18next, Axios, IndexedDB, Vitest

Full Stack Developer Intern (MERN) — *Better Tomorrow* 2024

- Developed full-stack web applications using the **MERN stack** with Redux state management, JWT authentication/authorization, and REST API integration.
- Engineered real-time data handling and advanced client-side routing across multiple web application modules.

PROJECTS

FitSphere — *Gym Attendance, Occupancy & Engagement Platform* [Live Demo](#) | [Code](#)

- Architected a full-stack platform on **Node.js + Express + MongoDB** with three roles (Member/Trainer/Admin) and **custom JWT auth** featuring access + refresh-token rotation and a server-side revocable token store.
- Streamed **live gym occupancy over Socket.IO** with an automatic polling fallback, and a server-side member directory powered by a single **MongoDB aggregation pipeline** for pagination, visit stats, and engagement status.
- Applied optimistic check-in/out with TanStack Query (socket-patched cache), debounced search with request cancellation (AbortController), internationalization (i18n), and full test coverage via Vitest with GitHub Actions CI.

Stack: React, TypeScript, Node.js, Express, MongoDB, Mongoose, Socket.IO, TanStack Query, JWT

IncidentDesk — *Incident & Request Management Tracker* [Live Demo](#) | [Code](#)

- Built a full-stack incident tracker with a **Java / Spring Boot** API on **Spring Data JPA / Hibernate + PostgreSQL** (Flyway migrations) and **layered role-based access control** (Admin/Reporter).
- Secured the API with **Spring Security JWT** (HTTP-only cookie) auth and an **audit-trail system** recording every admin action inside a database transaction, with optimistic concurrency.
- Shipped a React front end with optimistic UI, **cursor-based pagination**, AI-assisted incident triage (Gemini), and Socket.IO realtime; containerized with Docker and deployed on Render + Neon Postgres.

Stack: React, TypeScript, Java 21, Spring Boot, Spring Security, JPA / Hibernate, PostgreSQL, Flyway, Docker

EDUCATION

Sri Eshwar College of Engineering — B.Tech in Computer Science & Business Systems | CGPA: 7.8/10 2022 – 2026

SMBM Matric Higher Secondary School — HSC: 88.86% | SSLC: 90.8% (MSP Hr. Sec. School) 2019 – 2022

CERTIFICATIONS

Mastering Data Structures & Algorithms using C and C++ (Abdul Bari) Udemy, 2023
Database Management Systems NPTEL, 2024
SQL (Intermediate) HackerRank, 2024

ACHIEVEMENTS

- LeetCode:** 1580 (250+ solved) | **CodeChef:** 1167 (300+ solved) | **SkillRack:** 550+ solved | **1000+ total** DSA problems solved across competitive platforms
- Won **2nd Prize** in the Web App Development competition held at Sri Eshwar College of Engineering, 2024
